

NEW!

Dehydrated culture media for microbiology in preweighed *sachets*

One sachet per 500 ml of ready-to-use medium

- ✓ Saves time
- ✓ Excellent value

Scharlau

- ✓ **FAST** → Saves time as there is no need to weigh the powder
- ✓ **SIMPLE** → Open the sachet and pour contents into 500 ml of water
- ✓ **SAFE** → You inhale less powder than you would do extracting medium from a larger bottle
- ✓ **LONG SHELF LIFE** → 4-5 years, the same as with standard bottles with the added advantage that unlike bottles which once opened may absorb moisture, reducing the shelf life unopened sachets retain their shelf life
- ✓ **NO ERRORS** → Weighing errors eliminated
- ✓ **ECONOMICAL** → You only buy medium for 2,5 l (5 sachets) instead of having to buy a 500 g bottle
- ✓ **LESS WASTE** → Only use what you need

✓ You save weighing, you just have to...

1. Empty sachet

2. Fill the container

3. Autoclave if necessary

✓ Can be stacked horizontally to occupy little space

Dehydrated media in sachets are an ideal solution for media used in smaller quantities. The expense of buying a larger 500 g bottle is not incurred. Spoilage of unused medium that may occur when opening a large bottle is also avoided. There is little wastage as the customer is more likely to use 100% of what has been paid for. Valuable time used to weigh the powder can be saved as well as any errors associated with this process.

Ordering information

Description	Art. no.	Description	Art. no.
Acetate Diferential Agar	01-665BA05	Mueller-Hinton Broth	02-136BA05
Antibiotic Medium no. 1 Agar	01-009BA05	Neutralizing Broth acc. to Eur. Pharm.	02-512BA05
Antibiotic Medium no. 11 Agar	01-017BA05	Nickerson Agar (BIGGY Agar)	01-137BA05
Asparagine Broth	02-271BA05	Nutrient Agar (ISO)	01-635BA05
Baird Parker Agar Base (without supplement, see List of Reagents & Supplements art. no. 06-026)	01-030BA05	Nutrient Agar acc. to APHA	01-144BA05
